SUDEV KUMAR(FULL STACK DEVELOPER)

+91 8328847712 ◇ Cuttack, Odisha

sudevkumar82@gmail.com ◇ LinkedIn ◇ Portfolio ◇ GitHub

OBJECTIVE

Dynamic and driven Full Stack Developer with comprehensive training from Masai School, excelling in both front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, and React JS for front-end development, while adept in Node JS, MongoDB, and Express JS for back-end solutions. A strong foundation in Data Structures and Algorithms has enhanced my problem-solving capabilities, upon utilizing my leisure time by mastering CSS libraries like Chakra UI and Tailwind CSS.

EDUCATION

Master's In Full Stack Web Development, Masai School	**2022 - 2023**
Bachelor of Computer Application, Utkal University	**2017 - 2020**

SKILLS

Front-end	HTML, CSS, JavaScript, React JS, Redux, Chakta UI, and Taailwind CSS
Back-end	Express JS, Node JS, Mongo DB, and Mongoose
Others	GitHub, JIRA, and Data Structure and Algorithm

EXPERIENCE

Freelancing In Front-end Developer Role   2023
Narayana Enterprises   *Varanasi, Uttar Pradesh*

- Collaborated with Narayan Enterprise as a freelancer to develop a website aimed at securing government tenders.
- Designed the company logo and crafted the website layout using React JS and Tailwind CSS.
- Ensured full responsiveness of the website across various devices.
- Implemented engaging animations to enhance user experience.
- Incorporated a user-friendly contact form to facilitate seamless communication between clients and representatives.
- Leveraged my skills in web development and design to deliver a customized solution tailored to Narayan Enterprise's requirements.

PROJECTS

Fitness Club Developed a dynamic gym website using React, Material-UI, and Rapid API. Leveraged Rapid API to integrate over 1300 different exercises, enriching the user experience with diverse workout options. Implemented animations to add an engaging and dynamic touch to the website. (Try it here)

Avira Shop Developed a full-stack clone of the Meesho website as part of my Masai Sprint project. Led a team in utilizing technologies such as React, Redux, Google authentication, Chakra UI, Express.js, MongoDB, and Mongoose. Our collaborative efforts secured the project's second position among over 23 competing teams. (Try it here)

AirBnb Clone Created a comprehensive Airbnb clone using Next.js, Prisma, and Tailwind CSS. Overcoming the initial challenge of unfamiliarity with Next.js, I dedicated time to thoroughly studying the documentation and watching various online tutorials. Through this process, I gained a deep understanding of Next.js and successfully implemented it into the project, resulting in a polished and functional application. (Try it here)

EXTRA-CURRICULAR ACTIVITIES

- Represented my state in Badminton and served as the captain of my college's badminton team.
- Proficient in cricket and swimming.
